Work

From **October 2022 to September 2024** • Tokyo, Japan

Frontend engineer at Rakuten Group Inc.

Designed and implemented web features on an in-house marketing tool, working on both the JavaScript SDK and Frontend teams

Initiated architectural changes: gradual use of React instead of Vue, migration from create-react-app to Vite, creation of a common component library

Improved test coverage, with the help of Storybook and snapshot testing

Improved and standardized the team's processes and CI/CD pipeline

Identified and resolved user experience issues
